FOREWORD

College and University Programs in Canada is published by the Canada Employment and Immigration Commission to assist those who are planning to enter colleges and universities with the identification and selection of suitable educational or training programs and institutions.

Many students are uncertain about their long-term interests in terms of future work activity or have not established any relationship between work activities and educational programs. The programs presented in this publication are identified by the exact titles used by the institutions that offer them. These programs are listed alphabetically and are also arranged in an occupational classification. By this dual presentation, the publication provides a link between the college or university programs and the world of work.

AVANT-PROPOS

La Commission de l'emploi et de l'immigration du Canada publie "Les programmes des collèges et des universités du Canada" afin d'aider ceux qui prévoient s'inscrire à un collège ou une université, à identifier les programmes et les établissements qui les intéressent et à choisir les plus appropriés.

Plusieur étudiants sont incertains au sujet de leurs intérêts à long-terme, spécialement en ce qui touche leur futur emploi, ou ne voient pas le lien qui existe entre le monde du travail et celui de l'éducation. Cette publication présente les programmes sous la même désignation que les institutions qui les offrent. Les programmes sont énumérés selon un ordre alphabétique et catalogués selon une classification des professions. Cette double présentation fait ressortir le lien entre les programmes des collèges ou des universités et le monde du travail.

ACKNOWLEDGEMENTS

The Canada Employment and Immigration Commission wishes to acknowledge the contribution of the many individuals, both inside and outside the Commission, for assistance in preparing this publication, and in particular that of the post-secondary institutions which provided the essential information.

REMERCIEMENTS

Emploi et immigration Canada tient à exprimer sa reconnaissance envers les nombreux collaborateurs, tant de l'intérieur que de l'extérieur, qui ont participé à la préparation de cette publication. Elle veut remercier en particulier le personnel des établissements d'enseignement postsecondaires qui lui ont fourni les données essentielles.

INTRODUCTION

The information in College and University Programs in Canada was compiled by the Commission to help those who are entering colleges or universities and are in the process of making their selection of programs and institutions. Along with other components — Careers Provinces leaflets and Careers Canada booklets — College and University Programs in Canada has been designed as part of an information package to assist young people in making career decisions.

A decade ago, it was assumed that education was the key to personal economic success with little regard to the discipline or the program undertaken by the student. Changing economic circumstances, social trends, technological development and unrealistic employment expectations have resulted in students entering the labour market to face what, in hindsight, may have been avoidable disappointments. In a recent study of school leavers and the labour force a substantial number of graduates found that no relationship existed between their training and their jobs. Nevertheless, while only one of the purposes of education is to prepare individuals for employment, the school system is the largest single source of new workers for employers.

Perhaps if students had been inspired initially to consider more carefully their motives and the benefits to be derived from the post-secondary school programs which they were considering, many of the graduates would not be under-employed today due to the lack of demand in the labour market for the skills which they had acquired in the programs they had chosen.

To commence a program at a college or university, a student must first make a selection from among more than 5,000 programs that are offered by post-secondary educational institutions in Canada. The help users make effective selections, this publication presents the following:

(a) A series of tables to help them identify and associate educational and training programs with particular institutions, fields of work, and areas of potential occupational interest.

(b) Alphabetical listings of program titles (English and French).

(c) Program titles compiled by occupational area (English and French).

(d) Lists of the names and addresses of institutions.

The listings show exactly the same program titles as those used by the colleges and universities. This facilitates subsequent identification of programs of interest and referral to the program descriptions in the institutional calendars. Individuals who use the tables and listings in this process are thus provided with a base to broaden their understanding of occupational and educational relationships.

Before making any final decisions, the registrar of the college or university identified *should always* be consulted by the individual since the program offering, duration, content or title may be altered from time to time.

PRÉFACE

Les informations fournies par la présente publication, ont pour objet d'aider ceux qui veulent s'inscrire dans un collège ou une université et qui cherchent un programme d'études et une maison d'enseignement postsecondaire répondant à leurs besoins. De même que d'autres documents — à savoir, les feuillets "Carrières provinces" et les livrets "Carrières Canada" — cette publication fu conçue comme un élément faisant partie d'un ensemble visant à aider les jeunes à choisir une carrière.

Les études postsecondaires étaient, il y a à peine une décennie, la clé du succès sur le plan économique et ce sans qu'il soit tenu compte de la discipline choisie ou du programme d'études suivi. Cependant, les changements économiques, les tendances sociales, les progrès techniques et des attentes irréalistes quant à l'emploi ont mis les étudians dans une situation qui aurait pu être évitée. Selon de récentes études sur le marché du travail et sur la main-d'oeuvre, plusieurs diplômés avouent ne trouver aucune relation entre leur formation postsecondaire et le travail qu'ils effectuent. Néanmoins, même si l'école ne prépare pas nécessairement à un emploi, elle n'en demeure pas moins une source importante de main-d'oeuvre pour l'employeur en quête de nouveaux employés.

Si, jadis, les étudiants avaient considéré soigneusement leurs motifs et les avantages qu'ils comptaient retirer des programmes de niveau postsecondaire choisis, nombre de diplômés n'auraient pas eu par la suite à accepter un "sous-emploi", la discipline choisie ne correspondant pas à la demande du marché du travail.

L'étudiant désireux de poursuivre sa formation au postsecondaire doit, de prime abord, choisir parmi quelque 5,000 programmes offerts par les maisons d'enseignement du Canada. Afin d'aider les utilisateurs à faire les choix qui leurs conviennent, cette publication présente les données qui suivent:

a) Une série de tableaux qui aideront les utilisateurs à déterminer les programmes d'études et de formation qui sont donnés dans chaque établissement, les domaines d'activité ainsi que les secteurs de travail pouvant les intéresser.

b) Des listes alphabétiques des titres de programme (en anglais et en français).

c) Des listes des titres de programme, par secteur de travail (en anglais et en français).

d) Des listes des noms et adresses des établissements.

Les termes utilisés dans les listes de titres de programme sont exactement les mêmes que ceux employés par les collèges et les universités. De cette façon, les données peuvent être reliées avec précision aux descriptions complètes des programmes figurant dans les annuaires des établissements scolaires. Ce processus peut servir de base aux utilisateurs des tableaux et des listes, leur permettant d'élargir leur compréhension de la relation qui existe entre le monde du travail et l'éducation.

Avant de prendre une décision définitive, l'utilisateur *devrait toujours* consulter le secrétaire général du collège ou de l'université en cause, étant donné que la période durant laquelle le programme est offert, sa durée, son contenu ou son titre peuvent être modifiés de temps à autre.

HOW TO USE THIS PUBLICATION

SELECTING COLLEGE AND UNIVERSITY PROGRAMS AND INSTITUTIONS

1. GENERAL INFORMATION

Program data is presented to users in two different ways, a series of tables and in addition, an alphabetical and occupational lists of program titles:

a) Tables

The tables are compiled on the basis of four geographic regions with information from more than 250 post-secondary educational institutions in Canada. Programs are identified under fields of work and tabulated into 170 occupational area columns. Fields of work are named and number-coded across the top of table. Each field of work is sub-divided into occupational-area columns which are named and letter-coded. The colleges and universities are listed and coded vertically along the left side of the tables.

Through symbols and a legend, the tables indicate the length and level of programs which lead to degrees, diplomas or certificates. A symbol in the grid indicates that an institution offers at least one program within a particular occupational area. Also included are:

- Transfer programs for students who have the necessary credits to be accepted on an individual basis for admission to an affiliated college or university;
- Co-operative programs for students who want to study under a co-operative system by spending alternate terms in academic or vocational studies and time at work within business, industry or government; and,
- Apprenticeship programs for classroom instruction of apprentices (approximately 6 to 8 weeks per year).

b) Program listings

The names of the programs used in all lists of titles are exactly the same as those used by the colleges and universities. In addition to being arranged alphabetically in both English and French, the program titles are also listed and classified by occupational area and are arranged under the same coded headings as are used for the columns on the tables. Detailed user's information is provided with each listing.

2. HOW TO USE THIS PUBLICATION

There are three different ways of using this publication:

a) To Identify Program Titles That Appear As Symbols On A Table

From across the top of the table, examine the fields of work and occupational area column headings. Look down the column of the table that interests you and watch for symbols that indicate programs exist at a college or university. Note the occupational area and code. Turn to the list of occupationally compiled titles of programs under the selected occupational area code. You will find a list of program titles from which you may select those of interest to you. Each program is followed by one or several codes, each designating the regional table, institution and line of the table to be used.

COMMENT UTILISER CETTE PUBLICATION

COMMENT CHOISIR UN PROGRAMME ET UNE MAISON D'ENSEIGNEMENT POSTSECONDAIRE

1. GÉNÉRALITÉS

L'information sur les programmes est présentée de deux différentes façons; une série de tableaux et une série de listes de programmes par ordre alphabétique et par ordre de secteur de travail.

a) Les tableaux

Les tableaux sont établis par région géographique et fournissent des renseignements sur plus de 250 établissements postsecondaires du Canada. Les programmes sont indiqués par domaine d'activité et présentés dans des colonnes visant 170 secteurs de travail. Les domaines d'activité sont présentés, avec un numéro-code, au haut du tableau. Chacun d'eux est divisé en secteurs de travail qui sont, à leur tour, suivis d'une lettre identifiant la colonne du secteur. Les collèges et les universités sont énumérés verticalement dans la partie gauche des tableaux.

Au moyen d'une légende et de symboles, les tableaux indiquent la durée et le niveau de chaque programme conduisant à un diplôme ou un certificat. Le symbole situé à l'intersection indique l'existance d'au moins un programme offert par un établissement donné, à l'intérieur d'un secteur de travail en particulier. En outre, on y trouve:

- Les programmes transferables offerts aux étudiants pour obtenir les crédits nécessaires pour leur admission dans un collège ou une université.
- Les programmes d'alternance études-travail offerts aux étudiants désireux de faire alterner pédiodes d'études et stages de travail dans les affaires, l'industrie ou l'administration publique.
- Les programmes de cours théorique destinés aux apprentis (de 6 à 8 semaines par année environ).

b) Les listes de programmes.

Les termes utilisés dans les listes de titres de programme sont exactement les mêmes que ceux employés par les collèges et les universités. Par ailleurs, les titres de programme sont disposés dans l'ordre alphabétique, en anglais ainsi qu'en français; en outre, ils sont classés par secteur de travail. Dans ces listes, les titres sont disposés sous les mêmes rubriques de secteur de travail que celles qui sont utilisées pour les colonnes des tableaux. La façon de se servir des listes est expliquée dans chaque section.

2. COMMENT UTILISER CETTE PUBLICATION

Il y a trois différentes façons de se servir de cette publication:

a) Pour identifier les titres de programmes représentés par des symboles

Parcourez l'entête du tableau et examinez les domaines d'activité et les secteurs de travail. Explorez la colonne du secteur de travail qui vous intéresse: La présence de symboles signale l'existence de programmes.

b) To Select An Institution When You Have Decided On A Particular Program

Consult the alphabetical listing of program titles, select the one of interest and note its code. Each program is followed by one or several codes, each designating the regional table, institution and line of the table to be used. The code number preceding the program title refers to the column to be used on the table. A legend explains the program level and duration. Addresses of the colleges and universities appear in the last section of this publication.

c) To Select A Program When You Have Decided To Attend A Particular Institution

Locate the institution in the appropriate regional table. Note the institution's code number. With this code, turn to the addresses section of the publication. You will find the name, the address and the telephone number of the institution of your choice, as well as an alphabetical list of program titles available for the 1983–84 academic year.

Refer to the institution's calendar and decide on program suitability relative to your needs.

Retenez le secteur de travail et son numéro-code. Consultez le Classement des titres de programmes par secteur de travail et retrouvez le secteur de travail choisi, par son numéro-code. Parmi les titres de programmes énumérés, sélectionnez ceux qui vous intéressent. Chaque programme est suivi de codes, chacun désignant à la fois le tableau régional, la maison d'enseignement et la ligne du tableau à se référer.

b) Pour choisir une maison d'enseignement lorsque le programme est connu

Consultez la section ''Enumération alphabétique des titres des programmes'' et retenez le titre et le numéro-code du programme qui vous intéresse. Chaque programme est suivi de codes, chacun désignant à la fois le tableau régional, la maison d'enseignement et la ligne du tableau à se référer. Le numéro-code du secteur de travail, qui précède le titre du programme, identifie la colonne à utiliser dans le tableau; la légende explique la durée et le niveau de programmes.

Les adresses des collèges et des universités apparaissent à la fin de cette publication.

c) Pour choisir un programme lorsque la maison d'enseignement est connue

Retrouvez la maison d'enseignement dans le tableau régional approprié. Notez le numéro de l'institution. Retrouvez, par ce numéro-code, le college ou l'université qui vous intéresse, dans la section des adresses des collèges et des universités. Vous y trouverez le nom, l'adresse et le numéro de téléphone de l'établissement, ainsi que la liste alphabétique des programmes offerts pour l'année académique 1983-84.

Reportez-vous à l'annuaire de la maison d'enseignement pour établir si le programme répond à vos attentes.

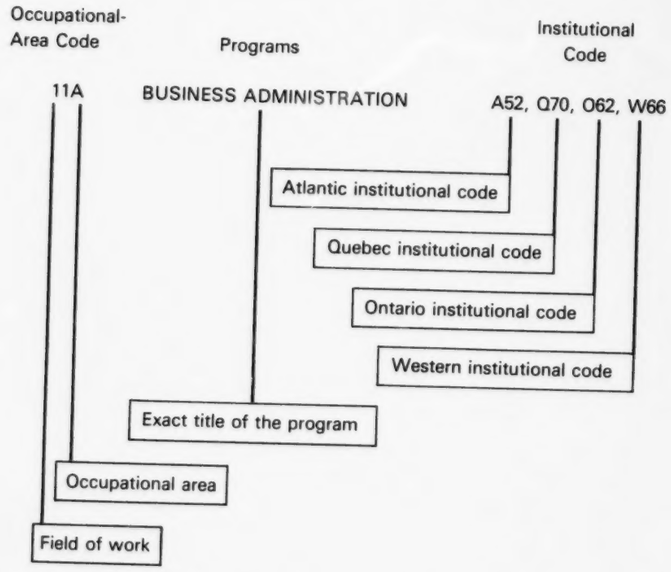
ALPHABETICAL LISTING OF PROGRAM TITLES

This listing of the exact titles of programs offered in colleges and universities in Canada is provided for use in conjunction with the program tables. Programs are arranged alphabetically with the fields of work and occupational-area codes from the tables. The letter and numbers which follow the program name indicate the geographic region and institution at which it is available.

In the following example, BUSINESS ADMINISTRATION programs are available at colleges or universities in the Atlantic Provinces (A), Quebec (Q), Ontario (O) and the Western Provinces (W). The institutional letter and number code corresponds to that used in the lists of addresses on page 113. The occupational-area code indicates the location of the applicable symbols on the program tables.



In *ALL CASES*, consult the appropriate college or university calendar since the duration, content, title or offering of programs may be altered from time to time.

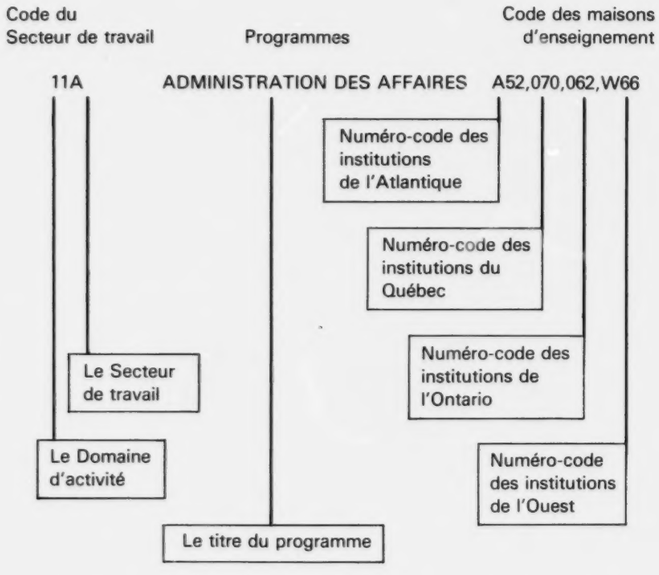
ÉNUMÉRATION ALPHABÉTIQUE DES TITRES DES PROGRAMMES

Cette liste des titres des programmes offerts par les collèges et les universités du Canada, s'utilise conjointement avec la section des tableaux de cette publication.

Les programmes sont énumérés alphabétiquement, précédés d'un numéro-code identifiant le domaine d'activité et le secteur de travail des tableaux. Les lettres et les chiffres qui suivent le titre des programmes indiquent la région géographique et les maisons d'enseignement postsecondaire qui dispensent ces programmes.

Dans l'exemple qui suit, les programmes en ADMINISTRATION DES AFFAIRES sont offerts par les collèges et les universités dans les provinces de l'Atlantique (A), du Québec (Q), de l'Ontario (O) et dans les provinces de l'Ouest (W). La lettre et le chiffre de chaque institution correspondent aux numéros employés dans la section des adresses, en page 113. Le numéro-code occupationnel indique la colonne des tableaux où il y aura un symbole.



Veuillez *toujours* consulter le collège ou l'université concerné, étant donné que ces maisons se réservent le droit de modifier la durée, le contenu et le titre des programmes.
